

Solutions for the Ocean from Pilgrim

Pilgrim has been removing uncertainty in marine since the mid 1940's. Our innovative coupling solutions help increase performance, save time and money by providing reliable propulsion coupling and fixing solutions.

> Coupling Bolt Solutions

With over 40 years' experience, Pilgrim is a world leading supplier of class approved hydraulically installed radially fitted bolts. Introduced into the coupling in a clearance fit they are easy to install and remove. These bolts are designed to be totally re-useable, while providing a truly fitted bolt once installed.

Who we are and how to contact us

Pilgrim International Ltd is a leading British engineering company based in Oldham, Greater Manchester. Specialising in providing high integrity joint and coupling solutions, such as hydraulically installed bolts and tensioning systems.

The company has a long history of serving the marine and navy sectors since the mid 1940's starting with a marine nut innovation. Since the invention and introduction of the Pilgrim Nut, Pilgrim has gone on to invent the Morgrip and Radially Fitted bolt solutions, eradicating many coupling issues experienced with conventional coupling bolt designs.

Our tradition of innovative engineering has continued over the decades helping the company to reduce unplanned costs.
